

2-2 RECTANGULAR SERIES MOBILE FILTRATION UNIT

ADVANTAGES

- Plug and play with on board speed control

Application	Suitable for use for both decommissioning and emergency clean up of Nuclear & Bio-containment facilities
Frame	Steel, painted
Rec. final pressure drop	900
Max Temperature (°C)	40
Max Temperature °C (Peak)	40
Relative Humidity max	100%
Installation Options	400V/3Ph/50Hz electrical supply required
Comment	Can be manufactured from painted steel or stainless steel

For use with rectangular HEPA filter inserts

"Primarily designed for the evacuation of contaminated air during the operation or decommissioning of radioactive or otherwise contaminated facilities. They provide high levels of performance and reliability and meet the requirements of the UK nuclear industry, UK & European legislation.

"
